EDUCATION

1337 Coding School | ***Information Technology Architecture*** **Khouribga, Ma 2022 - 2025**

TECHNICAL SKILLS

- **Technical Skills:** React.js & Next.js, Node.js & MongoDB, Javascript & Typescript, State Management, REST API Integration, Version Control/Git, Integration Testing, Flutter, Dart
- **Soft Skills:** Teamwork, Quick Learner, Problem-solving, Adaptability, Time Management

LANGUAGES

- ENGLISH
- FRENCH
- ARABIC

PROFESSIONAL SUMMARY

Full-Stack Developer skilled in **React, Next.js, and Flutter**, building scalable web and mobile applications with a focus on performance and user experience.

PROFESSIONAL EXPERIENCE

OneOut | ***Mobile Application Developer*** **Aug 2025 - Present**

- Developed a sliding block puzzle game using **Flutter**, delivering a smooth and engaging mobile experience with over 100 handcrafted levels focused on logic and strategy.
- Designed and implemented core gameplay systems including move optimization, hint system, undo functionality, and coin-based progression to enhance user engagement and retention.
- Focused on **performance, smooth animations, and UX**
- Structured a clean and maintainable architecture

ONEDUSTRY TECHNOLOGIES | ***FRONTEND DEVELOPER*** **Apr 2025 - Oct 2025**

- Engineered the responsive restaurant marketplace frontend using React and Next.js, fetching real-time data from RESTful APIs, which delivered smoother user interactions and higher engagement
- Successfully integrated Google Maps API for displaying precise restaurant locations and implemented a streamlined ordering workflow, including robust cart management.
- Conducted performance optimization and enhanced accessibility, collaborating with cross-functional teams to ensure seamless API integration and consistent UX

TACTUNE | ***FRONTEND DEVELOPER*** **Aug 2024 - Jan 2025**

- Developed a dynamic sonic sound branding agency site (in development) using Next.js and Tailwind CSS, adding an interactive project gallery and client request form, which increased client engagement with the prototype
- Achieved a superior 95% Lighthouse performance score via implementation of Framer Motion animations and a mobile-first design strategy.
- Collaborated directly with the client to implement precise design specifications and functionality requirements.

WATCHWISE | ***FULLSTACK DEVELOPER*** **Aug 2024 - Nov 2024**

- Developed a full-stack streaming website with Next.js, Tailwind CSS, and a custom Node.js backend using MongoDB, delivering a functional platform that lets users browse and watch movies without page reloads
- Integrated the TMDB API to fetch metadata and engineered real-time search functionality for trending movies/TV shows
- Implemented robust user authentication via NextAuth.js with MongoDB Adapter, enabling persistent storage for user watchlists and custom collections
- Built responsive modern UI with Radix UI and Framer Motion, featuring user profile management and email notifications via Nodemailer/Resend

SCHOOL GROUP PROJECT | ***FRONTEND DEVELOPER*** **Mar 2024 - Aug 2024**

- Developed a responsive multiplayer game using React.js, Next.js, and TypeScript, implementing WebSocket for real-time gameplay, in-game chat, and dynamic tournament brackets, which enabled players to compete instantly and increased session length
- Integrated user-friendly UI/UX for game controls, friends list, and real-time invitations.
- Engineered a comprehensive tournament system complete with bracket visualization and a WebSocket-based chat feature
